GBC Professional

DigiCoil

Automated ColorCoil® Inserter

Automate your coil binding with the first production system of its kind: the GBC® DigiCoil ColorCoil® Inserter. This production binding system is easy to set up, runs a full range of coil sizes, and sets the pace in your production environment.

Speed-up your binding productivity with the DigiCoil's fast, simple, tool-free setup. Because it has a unique three-point drive system, the DigiCoil System reliably binds books up to 33mm thick. It's perfect for both short and long runs in both digital and offset shops. The revolutionary design handles assorted stocks, index tabs, and oversized covers with ease.

Changeover for different book thicknesses takes less than two minutes. Simply measure the book thickness and size to determine the coil diameter and then position of element formers. Without tools, install the element formers, set the paper guides and bind. When necessary, readjust the height of the crimp cut knives. Binding is made even easier with the DigiCoil's auto run feature for continuous processing of books.

Features and Benefits

- No tools required for the setup of each job.
- Output stacker allows one operator to continue working while another removes finished documents.
- Accommodates coils from 8mm to 33mm.
- Features push-button operation on a convenient user interface.
- Takes up little floor space and can be moved easily.
- Auto run feature feeds and crimps coils automatically for quick production of large jobs.
- All standard GBC® punches accommodate the 4:1 oversized .2475 die set required for this machine.

Create an impressive presentation with these colorful binding elements. ColorCoil® adds energy to your reports and proposals, and demands attention. This element always keeps its shape with bounce-back flexibility. It lets pages lie flat with 360° rotation for convenient note taking and photocopying. And, it permanently binds, so you can be sure documents stay organized.
