HANDLING EQUIPMENT

ProCrease-M2.1

Creasing Machine

The JBUSA ProCrease-M2.1 is a manual channel creasing machine designed to prevent cracking in toner based digitally printed graphics. This is an updated version of our popular ProCrease-M2 with redesigned creasing spacers that are stronger and more durable, making the ProCrease-M2.1 better than ever.

It's easy to set up by any operator and is designed to accommodate small jobs for quick delivery to your customers. The registration system consists of two magnetic paper stops to assure exact position of each crease location on repetitive jobs. The ruler markings on the base and a fixed side rail ensures a square and accurate registration.

The ProCrease-M2.1 has a creasing width of 19-1/8" and a creasing channel width of 2 mm. Easy single handle operation allows the operator to hold the work in the exact location as they are creasing.

The all metal construction makes this machine durable. The James Burn USA ProCrease-M2.1, a simple, economical solution for low volume creasing applications.
